

MONEY matters

Family Medicine of Albemarle would like to inform you of some of our billing practices.

Preventive visit + Problem: though the preventive visit may be covered by your insurance company, a medical provider can bill when they address preexisting problems or an acute need.

Family Medicine of Albemarle has an early morning outpatient lab. This lab is convenient for you and will allow the provider to have results when they see you for your follow up visit. There is a copay for this lab.

Labs: tests may be ordered during a preventive exam that your insurance company will not cover in full but are important for your care.

Physicians are on call and can answer your questions. If they provide you care via the phone, they may bill you for their time and expertise.

If you pay in cash or are a self-pay patient, FMOA requests that you provide a \$50 copay at the time of check in. Please be prepared to pay for your visit in full or provide a credit to be placed on file. This is discount for self-pay.

If you have questions about tests, exams, co-insurance, copays and summary of benefits, please contact your insurance company directly. Your coverage is a relationship directly with you and your
